- [View warfarin alcohol/food interactions \(5\)](#)
- [View warfarin disease interactions \(8\)](#)

Most frequently checked interactions

View interaction reports for **warfarin** and the medicines listed below.

Unknown

Advair Diskus (fluticasone / salmeterol)

Major

Aspir 81 (aspirin)

Major

Aspirin Low Strength (aspirin)

Unknown

Calcium 600 D (calcium / vitamin d)

Moderate

Crestor (rosuvastatin)

Moderate

Cymbalta (duloxetine)

Major

Eliquis (apixaban)

Moderate

Fish Oil (omega-3 polyunsaturated fatty acids)

Minor

Flomax (tamsulosin)

Unknown

Lantus (insulin glargine)

Unknown

Lasix (furosemide)

- Moderate Lexapro (escitalopram)
- Minor Lipitor (atorvastatin)
- Unknown Lyrica (pregabalin)
- Unknown Metoprolol Succinate ER (metoprolol)
- Unknown Metoprolol Tartrate (metoprolol)
- Unknown MiraLAX (polyethylene glycol 3350)
- Moderate Nexium (esomeprazole)
- Moderate Norco (acetaminophen / hydrocodone)
- Major Plavix (clopidogrel)
- Unknown Spiriva (tiotropium)
- Major Symbicort (budesonide / formoterol)
- Moderate Synthroid (levothyroxine)
- Moderate Tylenol (acetaminophen)
- Unknown Vitamin B12 (cyanocobalamin)
- Minor Vitamin C (ascorbic acid)
- Unknown Vitamin D2 (ergocalciferol)
- Unknown Vitamin D3 (cholecalciferol)
- Unknown Xanax (alprazolam)
- Unknown Zyrtec (cetirizine)

Warfarin alcohol/food interactions

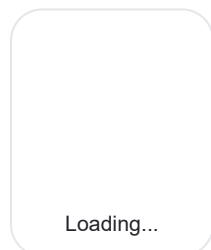

There are 5 alcohol/food interactions with warfarin.

Warfarin disease interactions

There are 8 disease interactions with warfarin which include:

- Major** bleeding
- Major** diabetes
- Major** hypertension
- Major** liver disease
- Major** protein C deficiency
- Moderate** decreased response
- Moderate** increased response
- Moderate** renal dysfunction

Report options

Drug Interaction Classification

These classifications are only a guideline. The relevance of a particular drug interaction to a specific individual is difficult to determine. Always consult your healthcare provider before starting or stopping any medication.

Major	Highly clinically significant. Avoid combinations; the risk of the interaction outweighs the benefit.
--------------	---

Moderate	Moderately clinically significant. Usually avoid combinations; use it only under special circumstances.
-----------------	---

Minor	Minimally clinically significant. Minimize risk; assess risk and consider an alternative drug, take steps to circumvent the interaction risk and/or institute a monitoring plan.
--------------	--

Unknown	No interaction information available.
----------------	---------------------------------------
